

A200 - Ovechkin Moves to Score - RB U17-20

I watched highlights of Ovechkin scoring two goals the other night and the moves he used are right out of this sequence he learned from his former coach in Russia. The first goal he faked a shot then pushed the puck outside the defenders shin pads on his forehand, shot and scored. Next goal he did the same but added pull across and slide backwards - shoot - Score.

Vladimir Jursinov has send over 65 players to the NHL. He coached Moscow Dynamo during the Soviet era and was assistant to Tikonov when they dominated the Olympics and World Championships. In 98 the first time NHLer's played in the Olympics the Russian players who were in the NHL insisted he be the head coach for the Olympic team or they wouldn't play. He has coached other Olympics since.

This is a 1-1 sequence that gives options to score.

I was lucky enough to coach with Jursi in Austria and took video so I would remember what he did.
